

Connect MAP Growth with Instructional Connections you already use

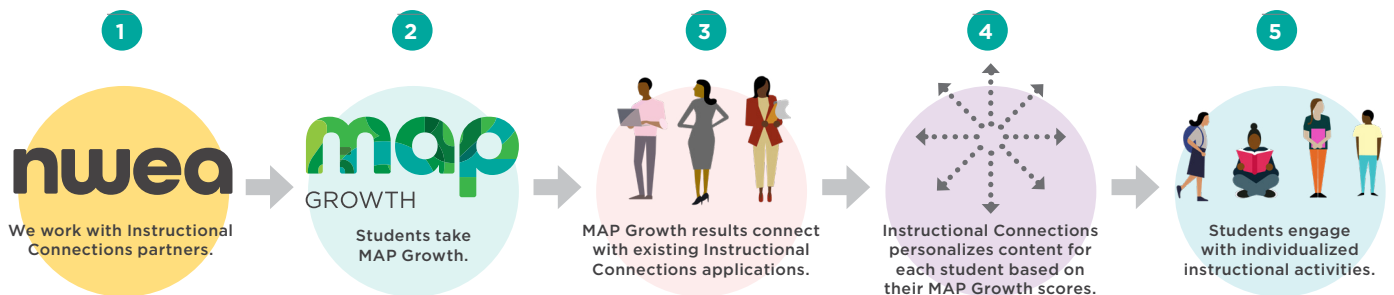

We learned, from teachers, that assessments results that quickly connect to curriculum and instruction is very important to support the needs of student learning. That's why we created an Instructional Connections program that takes MAP Growth data and connects it to multiple instructional providers that schools already use.

Through our Instructional Connections program, educators can:

- + Provide students with instructional content aligned to individualized learning needs
- + Create personalized learning pathways for 1:1 support, small group, and whole group learning
- + Generate instructional resources and lesson plans
- + Maximize learning decisions
- + Drive student growth, meet intended goals, track progress

How it works

Our vetting process

We've worked with educators around the world to understand the tools they already have in place that could benefit from connecting to MAP Growth data --- We have carefully vetted each to ensure that our connects provide the same value and precision you've come to count on us for making sure that content is:

- + Standards - aligned, with appropriate depth and instructional relevance
- + Built for diverse student populations
- + Considers accessibility and accommodation needs
- + Built on effective instructional best practices
- + Engaging across multiple modes of students learning

Featured partners

We collaborate with the industry's most extensive array of instructional partners we help schools and districts get more from tools they're already using to support grades K-12 in math, reading, writing, and science. Explore our featured partners and learn how you can connect your MAP Growth results with your existing resources.

map Accelerator

powered by  Khan Academy

Grades: 3-8 **Subjects:** Math

To help teachers to unlock learning gains for every student, NWEA® has partnered with Khan Academy® to develop MAP® Accelerator™. This powerful online tool ties MAP Growth scores to personalized learning pathways so students get support tailored to their needs, whether on, above, or below grade level.
